# MICROPUBLISHER 5.0 & 3.3 RTV – COOLED OR NON-COOLED

High-Resolution IEEE 1394 FireWire™ Digital CCD Color Camera with High-Speed Real-Time Viewing

The QImaging MicroPublisher with Real-Time Viewing (RTV) delivers unsurpassed interactivity and productivity by combining ultra-high-resolution images with video-like, full-field-of-view frame rates up to 30fps. Scanning, framing, and focusing have never been easier than with the MicroPublisher RTV. The 30-bit color digitization produces high-quality images of brightfield, darkfield, and fluorescence work. For demanding low-light applications, the MicroPublisher RTV Cooled camera minimizes thermal noise during long exposure times. With an IEEE 1394 FireWire™ digital interface, the MicroPublisher RTV is easy to install, requiring a single wire to connect the camera to a computer or laptop. The MicroPublisher RTV eliminates expenses, installation problems, and inconveniences associated with framegrabbers and external power supplies. All cameras ship with image-capture software. A large selection of specialty software applications is available from QImaging's software partners. A **Software Development Kit (SDK)** is available upon request for interfacing the MicroPublisher RTV with custom software.
